

MSSL NEWS

APRIL 2018

April Events

April 23rd -26th: Spring Parent-Teacher Conferences are set for the week of the 23rd to the 26th (Monday through Thursday) with our Spring Carnival to cap off the week on Friday!

April 27th: MSSL Spring Carnival!

Come one, come all, to the spring carnival! We are moving the carnival up to the last Friday of April to (hopefully) catch some excellent party weather.

Our annual carnival starts at 4:30 pm and goes until 7:00 pm with a variety of food and fun for all ages!

This is our one early release day scheduled for the year, with the school set to close at 4:30 pm so that everyone, staff and student alike, can participate and join in the carnival together with all of our children and classmates.

May 3rd: Kindergarten Night

We invite our Primary Class families to join us at 5:30 pm for a presentation and question session regarding the Montessori Kindergarten Year and its value to your child's personal and academic growth.

Parent Survey

Please take a moment to complete the Spring 2018 Parent Survey. Your feedback is quite valuable to us and used to inform decisions and improvements for the school on an ongoing basis.

The survey link below should have come to you in an email. If you have not received it, please let us know.

Safety Says:

With spring in bloom, children and adults alike have had their seasonal allergies acting up!

Do be careful to keep allergy medication out of reach of children and follow doctor's instructions carefully. Also, please be mindful that many over the counter cold and allergy medicines are formulated for adults and older children and should only be used with younger children under specific instructions from their doctor.

News around the school:

This month and last have been quite busy! In February we launched our Primary 3 classroom with Ms Heather. March brought a spring blossoming of families joining the school, and now April finds us launching a shiny and new classroom space for our older and walking infants.
